On-Call Handbook

Rotation

On-call rotations last 7 days and start on Mondays at 10:00. Each rotation has a primary and a secondary engineer.

Compensation

Engineers receive a flat on-call allowance of 350 euros per week plus time off in lieu for any night-time call-out lasting more than 1 hour.

Escalation

If the primary does not acknowledge a page within 10 minutes it escalates to the secondary and then to the engineering manager.
